If loader buckets are equipped with bolt-on cutting edges, both the forks on this page are available with wide opening, just add **W** to model number.

### FEATURES:

- 2 Heavy screw-lock clamp brackets w/zinc plated handle/screw assemblies
- 2" Square, 1/4" wall tubing by 20" long tines
- Clamps fit deep into the bucket for added strength
- Clamping brackets placed near bucket side plates for added strength

A loader bucket is great for moving soil, but handling trash is a problem. Our Trash Forks are an economical and easy mount solution to this problem. This handy tool will make moving tree branches and other debris an easy task.

## TOOTHBARS

Other **Toothbars** require the exact width on the inside of bucket because you have to drill holes in the side of the bucket and bolt the toolbar to lock in place. Our new unique toolbar uses set screws to lock the toothbar to the bucket. This system allows for easy on and off, without having to drill holes in the bucket. When working in hard ground you can mount the cutting toothbar in a couple minutes. When working in loose soil and doing finish grading, you can quickly remove the toothbar.
