

For Front Or Rear Mount 3-Point Tractors

"GMS" SERIES

This **Shredder** is specially designed for shredding standing trees and tall shrubs or for down material. The brush frame, as shown, is used when driving into standing material. When driving over loose, down material, a rear roller is used in place of the brush frame and skids. The **Maxi Shredder** has a 1000 R.P.M., 110 HP gearbox. It can be front or rear mounted. The reversible, drop forged, hammer knives will shred trees up to 8" in diameter.

The shredder is ideal for clearing utility right ways, reduction of wood waste in landfills, land clearing, fire lanes and many agricultural tree and plant residue shredding applications.

REVERSIBLE HAMMER KNIVES

FEATURES:

- Cat. 2, 3-point hitch, center mount
- Front or rear tractor mount
- Shreds brush and trees up to 8"
