

Available In Widths Of 48" & 60" With Briggs & Stratton 13 or 17.5 HP Engines

Our **Rotary Mowers** are designed with a special safety remote, electrical stop feature. The system has dual action engine stopping controls: a manual stop switch if you run into obstructions in the mowing area, and an automatic stop system by placing the controls between your hip and the vehicle seat. This feature automatically stops the engine for the unlikely event that you fall from the vehicle.

## FEATURES:

- Briggs & Stratton industrial/commercial OHV engines
- 12 Volt electric start
- 48" & 60" Cutting widths
- Dual action remote control electrical engine/blade stop safety system
