

RIPPING CHISELS

GRC SERIES - 3 BAR FINISHING CHISEL

A. S. A. E.
QUICK
HITCH
COMPATIBLE

21' Model w/optional rear hitch, less points

Our 3 bar finishing **Ripper Chisel** is an effective implement for loosening soil up to 15 inches deep. The rigid shank design insures consistent depth. The narrow 12" shank spacing is excellent for breaking up and incorporating of residue. These ripping chisels are the perfect tool for opening up heavy soils for aeration. The main shank bars are on 3 foot centers and shanks are staggered to obtain maximum trash clearance. A large number of cross tubing braces are placed between the shank beams for added strength. The shear bolt shanks allow for higher speeds than most tillage implements.
