

COMPOST SPREADER

*Shown With Optional Band
Spread Attachment*

This unique spreader is able to spread a wide range of materials such as: compost, peat, concentrated manure, lime, gypsum, dried grape pomace and other types of fertilizer. The spreader was designed for two different spreading operations. You can broadcast spread and add the side conveyor for band spreading.

Three separate features are built into the spreader to achieve the application of this large group of products. Patented two gearbox system, one to power the spinner and a second gearbox geared to a low R.P.M. for the agitator. Full length agitator blades turn slowly at the bottom of the hopper. Lastly, two large shutter openings for releasing bulky material. All these features make this spreader a very versatile product.

Less Band Spread Attachment

FEATURES:

- ❑ Cat. 1 & 2, 3-point hitch
- ❑ For 540 R.P.M. PTO tractors
- ❑ Hopper capacity - 35.3 cubic feet
- ❑ Load capacity - maximum 1320 pounds
- ❑ Patented double gearbox system
- ❑ Two manual dials to adjust the dual shutter openings
- ❑ The spinner turns at 718 R.P.M. and the agitator turns at 77 R.P.M.
- ❑ Hydraulic cylinder for on and off
- ❑ For tractors 50 to 150 horsepower
- ❑ Spread width 20 to 45 feet
- ❑ Spread distance with band spread attachment - up to 12 feet
- ❑ Maximum material size - ½ inch
- ❑ Full length agitator blades
- ❑ Stainless steel spinner disc and fins
- ❑ Metal hopper with special anti-corrosion baked on paint
- ❑ Safety plate filling platform
