

# IMPLEMENTS FOR GROWING HEMP

## POPULAR PRODUCTS FOR GROWING HEMP

### *Vacuum Planters*

Our Precision Vacuum Planters are designed for extremely accurate hemp seed placement. The P.T.O. driven turbine fan creates a vacuum that draws seeds against the seed plates. Inner and outer singulators remove double to insure that individual seeds are secured to the vacuum hole. At the seed release point, vacuum is cut off and the seed is deposited in the furrow. We will custom build this planting system to your specifications.

### *Mulcher/Bedders*

These high-performance mulchers break up the heaviest soils for better planting performance and controlled tillage depth, regardless of soil condition. This also allows the grower to set planter, cultivators, and harvesters at one constant depth. The culti-mulcher tills and builds perfectly formed beds and are available in one or 4 beds. The units can be supplied for the row widths you require.

### *Twin Spinner Spreader*

Our 2300 pound, 35 cubic foot capacity spreader features twin stainless steel spinner discs which are extremely accurate with only 6.7% variance across the spread pattern. The spreader has dual levers to set the pounds per acre and hydraulic cylinder for off and on. This broadcast fertilizer spreader has a maximum spread of 58 feet. It is best to apply the material before bedding up to rows. Model number is RE-1000.

### *Air Blast Sprayer*

The compact, self contained, engine driven air blast sprayers was designed for very narrow hemp rows and muddy conditions. This allows for operating the sprayer with a ATV/quad. The spray nozzles are easy to adjust and can be individually shut off. Controls allow for turning off one side. You can shut off the spray and disengage the fan for handgun spraying.

# IMPLEMENTS FOR GROWING HEMP

## *Flail Mower/Shredders*

Our Mower/Shredder is the ultimate in flail shredding with 3 pound drop forged hammer knives. Some of the other features are front or rear mounting, large 6 inch diameter rear roller and two rows of drop forged recutter bars for finer mulch. Excellent for mulching up the Hemp stalks after harvesting. This GRF Series is available in cutting widths of 59 to 98 inches.

## *Cannon Sprayer*

This unique sprayer was designed to produce a curtain of fog sized spray up to 90'. Our Venturi Air Sprayers feature the latest technology in concentrate spraying. Thus, users achieve the following benefits: spray atomization of spray droplets are smaller and more uniform, less fill-ups, even distribution of concentrated spray, complete coverage, better product utilization and less chemical waste and soil/water contamination. The sprayer is recommended where you have limited access to the rows.

## *Venturi Air Boom Sprayers*

Our Venturi Air Boom Sprayers were developed to obtain total plant coverage, especially the underside of leaves. This system of fine micron droplet spraying achieves the following benefits: spray atomization of droplets are smaller and more uniform, less fill-ups, even distribution of concentrated spray, better product utilization, less chemical waste, and soil/water contamination. These air boom sprayers are available in 23, 27, or 40 feet.
