DIG DEEPER, FASTER & SMARTER

The Worksaver Post Hole Diggers are engineered to allow the operator to dig deeper, faster and smarter. Worksaver's line of PTO powered diggers offer time saving convenience with outstanding reliability. Shear bolt protected driveline is coupled to a rugged gearbox featuring tapered roller bearings and spring loaded seals for extended service life. Large 2" output shaft has two bolt auger connection for reliable power transfer. All job matched augers utilize fishtail center points with double flighting on the first turn for quick, positive digging action right from the start.

Worksaver

Worksaver Post Hole Diggers Dig Deeper, Faster & Smarter

Model 300 is ideal for the small acreage owners. This model mates to most sub-compact tractors with a Cat. 0 or limited Cat. I, 3-point hitch. Standard positioning handle allows the operator to position the auger from the tractor seat. Augers 30" in length are offered in 6", 9" and 12" diameters providing versatility when digging holes.

Model 500 is the most popular digger. This standard duty digger offers 3 position boom adjustment allowing it to adapt to most tractors. Tubular steel stock of 2.875" diameter is used for the boom for increased durability. Horseshoe yoke allows the unit to operate on Cat. I tractors offering the operator versatility of use. Job matching augers is easy; they are 42" in length in 6", 9" and 12" diameters in double flight configuration. Position handle is standard equipment.

Model 720 offers increased performance on this heavy duty digger. Designed for Cat. I/II tractors, this model offers 3 position boom adjustment, rugged gearbox along with 3 1/2" diameter boom for dependable operation. Augers (42" length) are available in 6", 9", 12", 14", 18" and 24" diameters in double flight and heavy duty configuration offering the outmost in productivity.

Model 925 industrial duty workhorse provides dependable operation when mated with any auger from 6" to 30" in diameter. It fits any Cat. I/II tractor with 540 rpm PTO. When maximum performance is required, the 4.1:1 ratio gearbox provides the torque to make the operator more productive.
