VINE TRIMMERS

PROFILMATIC® VINE TRIMMERS FOR GRAPES

ENGINEERED FOR RELIABILITY AND EFFICIENCY.

COLLARD'S Trimmer/Hedger was designed for half row trimming for a number of crops. The unit features two different cutting systems - saber profile blades, or dual swinging knives. The heart of this Trimmer is the unique lightweight aluminum alloy extrusion that provides a rugged rust-proof framework for the cutting blades. This blade framework is so strong that it has a lifetime guarantee.

Model P1100Z shown

JOYSTICK

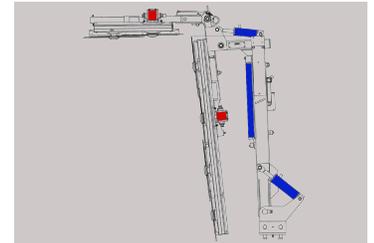

Compact joystick with "user friendly" controls.

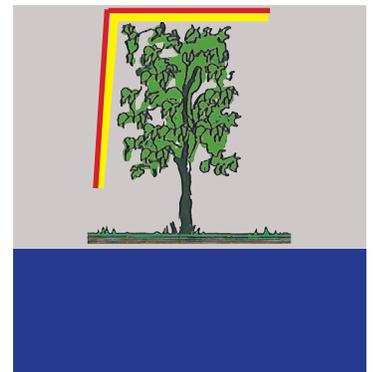

VINE TRIMMERS

STANDARD FEATURES

- Heavy tubing frame
- "State of the Art" hydraulic motors to insure long life
- Flow limiter for motor controls
- Smooth, thin line blade transmission for easy movement through the foliage
- Rigid deflectors so cut material is thrown away from the operator
- Wide range of adjustments for setting trimmer to grower's exact requirements
- Strong, but lightweight and easy to operate
- Blades turn at 2,200 R.P.M., ensures clean cane ends, which dry and seal neatly to reduce the risk of disease
- Machine runs smooth and quiet, with no vibration
- Equipped with electro-hydraulic joystick controls for precise trimmer adjustments
- Hydraulic cylinders are fitted with load/hold check valves for safety in case a hose fails

2 - hydraulic motors (red)
3 - hydraulic cylinders (blue)

SPECIAL FEATURES

- Trimmer can be side or front mounted
- Main trimmer beam has hydraulic up and down with 20" stroke cylinder
- Main beam tilts to one side with 6" stroke cylinder
- Upper cutting element has hydraulic tilt (slope)
- Vertical breakaway system to protect equipment
- Complete hydraulic distributor, hoses, and JIC couplers
- Storage stand for parking the trimmer
