# PENDULUM SPREADERS

## "PDV" & "PDC" SERIES

## PRECISION SPREADING, SIMPLIFIED.

Our line of Pendulum Spreaders feature exact rate/spread control, quick change spouts, low filling heights and easy maintenance. These spreaders are very accurate and the pendulum movement of the spout back and forth insures that the application rate is always identical on both sides. The pendulum system also achieves accuracy as the material is spread only to the rear of the spreaders thus wind becomes less of a factor. Using the reference chart on the hopper, you simply turn the dial on the adjusting rod to the required pounds per acre. These versatile spreaders are popular for orchards, vineyards, turf, and general farm applications.

Model PDV500 shown

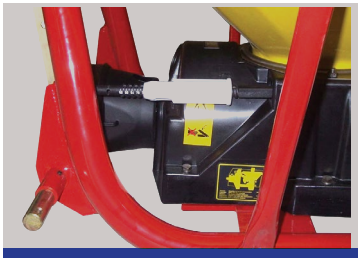

Model PDC400 shown

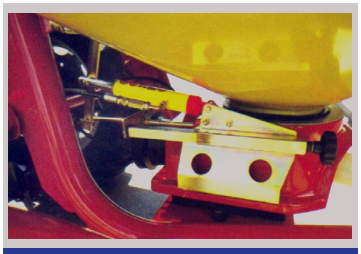

# PENDULUM SPREADERS

## FEATURES

- 3-point hitch, 540 R.P.M.
- Corrosion free, molded fiberglass hoppers except PDC400
- Model PDC400 has a poly hopper
- Capacities of 925 to 2000 pounds
- Standard spout 20' to 46' spread
- Stainless steel base and opening shutters
- Steel tubing main frame
- Easy to adjust rates settings
- Mechanical agitator at base of hopper
- Frame is powder coated with baked on paint

Easy to adjust lbs/acre by simply turning the dial

Optional hydraulic cylinder controls
