SPINNER SPREADER

PULL TYPE - GROUND WHEEL DRIVEN

SEED & SPREAD WITH EASE.

Our Seeder/Spreader is a self-contained, towable implement that can be operated by almost any vehicle. This unit has a ground driven, cast iron oil bath gearbox that can be disengaged when transporting. It is ideal for spreading seed, fertilizer, sand and salt. The large 20" diameter x 10" wide tires makes this a "Turf Friendly" implement. The spreader features a cable control that allows the operator to adjust spread rate and turn the spreader on and off from the vehicle seat. This is a popular, economical spreader for golf courses, parks, sport fields and turf farms.

Model PTB560 shown

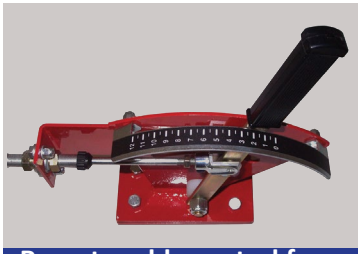

To insure easy clean out, the flow openings are in the bottom of the hopper

SPINNER SPREADER

FEATURES
