REAR BLADES

5 & 6 FOOT - FOR 30 TO 40 HORSEPOWER TRACTORS

TACKLE TOUGH JOBS WITH EASE.

The Gearmore Rear Blades are the answer for compact tractor earth-moving requirements. They are the most versatile rear blades on the market today, as all of the adjustment features normally found only on large expensive rear blades, are standard on the Gearmore Rear Blade. Tilt, angle, offset and reverse are easy to adjust so that any grading or ditching operation may be accomplished. Parking stand is now standard equipment.
