E10 DIRECT MULCHERS

FOR MOUNTING ON COMPACT EXCAVATORS

CONQUER THE UNREACHABLE WITH OUR MULCHERS.

The hydraulic motor of the excavator Mulcher E10 Direct is directly connected to the rotor without any additional components, making this an extremely compact and powerful machine, capable of shredding brush up to 4" even with small excavators. Equipped with a drainless motor, it requires one supply line and a free return line (hammer line). The powerful forestry rotor with depth control - the CUT CONTROL system - fitted with mini blade or optional mini duo hammers ensures precise operation and clean cutting quality.

E10 DIRECT MULCHERS

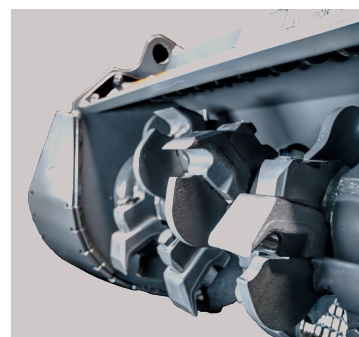

FEATURES

- Mounts to compact excavators and other types of hydraulic booms
- For excavators weights of 5,500 to 13,000 pounds
- Mulches brush and wood up to 4"
- E10 directly couples to hammer line so no case drain is needed
- With direct drive it eliminates the risk of failure due to wear-related belt breakage
- Required hydraulic flow - 6 to 16 gallons per minute
- Hydraulic pressure 1,450 to 3,350 PSI
- Hood is made of high tensile, wear resistance AR400 steel
- Rear protection with chains
- Support skids reinforced with replaceable steel plates
- Cut control system with the specialty developed gauge reduces the depth of cut for an efficient fast cut and fine mulch
- Replaceable tempered counter cutters
- Motor protected in hood with integrated heel to support stability on slope
- With hoses

OPTIONS

- Mini duo carbide hammers
- Hydraulic rotation plate 190°
- Heavy duty models available to mulch material up to 16 inch diameter

SPECIFICATIONS

Model #	Working Width	Overall Width	Depth	Number of Blades	Weight
E10-Direct 60	24"	39"	21"	12	420 lbs.
E10-Direct 85	33"	49"	21"	18	490 lbs.
