

# SPADERS

For deep tilling hard ground

The **Series VM Medium Duty Spaders** feature a 3 speed gearbox with lever to quickly shift to different speeds. The gearbox has speeds of 145, 166 & 191 R.P.M. These Spaders are a vertical tillage implement, as the spades dig straight down and then turns the soil. The ground is then aerated to an approximate depth of 12 inches. Spaders are a very effective tool for deep digging hard soils without intermixing subsoil with the top soil. The Spaders produce loose texture soil that holds moisture and reduces erosion. Spaders are the ideal implement for farms, vineyards, orchards, etc.

## FEATURES:

- Cat. I, 3-point hitch, 540 R.P.M.
- 3 speeds gearbox
- Gearbox can be set for speeds of 145, 166 or 191 R.P.M.
- Gearbox maximum horsepower 60
- Spading depth of 12 inches
- Steel side plates to contain the soil
- Adjustable skids for setting the depth
- Adjustable rear tailboard
- Class 5 driveshaft with slip clutch
- Parking stand

| MODEL # | SPADING WIDTH | OVERALL WIDTH | NO. OF SPADERS | MAX. H.P. | WT.    |
|---------|---------------|---------------|----------------|-----------|--------|
| VM6 135 | 52"           | 60"           | 6              | 60        | 1,000# |
| VM6 170 | 66"           | 74"           | 8              | 60        | 1,250# |
